SUMMARY

Full-stack developer and MCA student building React, Node.js, and MongoDB applications with tested, concurrency-safe backends. Recent projects include a peer-to-peer EV charging marketplace and a waste-accountability platform with data-driven forecasting. Research presenter and IEEE Computer Society chapter chair, seeking software development or data roles.

WORK EXPERIENCE

Intern May 2026 - Jun 2026

ComedKares | Bangalore, India

Python | Machine Learning | Design Thinking | User Research

- Completed a 5-week AI/ML internship covering design thinking, Python, data analysis, and machine learning.
- Applied design thinking methods, including empathy mapping, problem identification, ideation, prototyping, and solution validation.
- Contributed to the research paper and technical implementation of Pawkart, an AI-driven retail inventory and operations platform, focusing on inventory accuracy, reducing stockouts, and hyperlocal delivery.

Web Development Intern Jul 2023 - Sep 2023

ACMEGRADE | bangalore, India

PHP | Java | XAMPP | MySQL | HTML | CSS | JavaScript | Web Development

- Developed an Amazon-inspired e-commerce website with a responsive UI, product listings, navigation, and core shopping features.

PROJECTS

ChargeShare India, Link

- *React | Node.js | Express | MongoDB | Razorpay | Jest*
  - Built a peer-to-peer EV charging marketplace where hosts list private chargers and riders book 30- and 60-minute slots, with map-based search, Razorpay payments, and QR check-in.
  - Prevented double-booking with a MongoDB unique partial index. In a Jest concurrency test, 25 simultaneous requests produced exactly one booking and 24 conflicts.
  - Built admin KYC and electrical-safety verification, tiered cancellation refunds (100%, 50%, 0%), role-based access control, and DPDP Act 2023-aligned account erasure. 134 automated tests across 16 suites pass.

GreenPay, Link

- *React | TypeScript | FastAPI | PostgreSQL | Pytest*
  - Built a Bengaluru/BBMP waste-accountability platform that rewards verified doorstep collection using permanent citizen QR codes, an append-only reward ledger, and an explainable 0–100 Green Score.
  - Implemented offline-first weighment sync, anomaly detection, role-based access with tenant isolation, and ward-level analytics with OLS waste-volume forecasting. Deployed on Vercel.

Nova Voice Assistant, Link

- *Python | FastAPI | React | ElevenLabs | Anthropic Claude*
  - Developed a real-time voice assistant with two modes: an ElevenLabs Conversational AI agent, and a custom pipeline (VAD, Scribe STT, Claude LLM, Flash TTS) with barge-in interruption support.
  - Built a 3D React interface and FastAPI backend with conversation history and unit tests for VAD, memory, and LLM modules. Deployed on Vercel and Render.

SKILLS

- **Technical Skills:** Python, JavaScript, TypeScript, Java, PHP, SQL, HTML, CSS
- **Top Soft Skills:** Leadership Communication Project Management Problem Solving Adaptability
- **Frameworks and tools::** React, Node.js, Express, FastAPI, Tailwind CSS, Git
- **Databases and AI::** MongoDB, PostgreSQL, MySQL, Machine Learning, Data Analysis, Anthropic Claude API

EDUCATION

undergraduate, B.Sc Computer Science & Statistics | St Joseph's University, bangalore, India Jul 2022 - Jul 2025

Intermediate, PCMC | St. Joseph's Indian Composite PU College, bangalore, India Jul 2020 - Jul 2022

Master of Computer Applications (MCA) | St. Joseph's University, Bangalore, India Jul 2025 - Present

ACHIEVEMENTS

Runner-up, Paper Presentation (IT Track), KAGADA 2026, IEEE UVCE

Placed runner-up among ~200–250 participants at a national-level student conference, presenting "An Edge-Intelligent and Secure Framework for Hierarchical Industrial IoT Architectures."

Research Paper Presentation – ICTIT 2025

Presented "Crafting a Digital Experience: An E-Commerce Venture for Restaurants" at the International Conference on Current Trends in Information Technology (ICTIT 2025).

Chairperson, IEEE Computer Society Student Chapter

- Lead the chapter; organize technical workshops, seminars, and career development activities with faculty and industry experts.

CERTIFICATIONS

Cyber Security and Privacy, NPTEL. Score: 76% (Elite + Silver)
